

Diversion Furrows (run-on ditches, run-on, ex-field RWH)

Sharing knowledge on the use and conservation of water for food production

Type and Scale(s)

Catch and Use
Diversion of
runoff water onto
cropland.
Brings water
from outside the
area to the field.

All Scales

Description and Purpose

Takes rainwater
runoff from gullies,
grasslands or hard
surfaces (such as
paths or roads) to a
cropped area or to
a storage tank.
This increases the
water available to
the plants. Used for
fieldcrops and in
gardens.

Other Factors

Low to medium
technology,
Medium skills
and
understandings,
Low to medium
cost (mostly
labour)
Medium
maintenance
